# ZBULO MËNYRËN E RE PËR TË PRODHUAR **ENERGJI** TË PASTËR

U krijua **Infinity Power**  
kompania italiane **Made in Italy**  
që të lejon të kursesh energji në faturën e energjisë elektrike

E gjitha kjo falë stafit tonë profesional dhe shërbimit  
të klientit post shitjes që ne ofrojmë, për ta  
bërë jetën tuaj më "jeshile" dhe më pak të kushtueshme

Oferta të disponueshme si për klientët private dhe për klientët biznes

# Our Objectives

---

Our goal is to provide technical and commercial support to households and businesses in the best solutions in terms of energy efficiency both in terms of self-production and in terms of reducing consumption. One of our strengths is the use of Made in Italy products that allow us to offer our customers European quality standards. We cooperate with our engineers in Italy who work alongside our Albanian engineers in this field.

---

# Our main products

We are listing 2 of our products that we currently trade in Albania:

-PHOTOVOLTAIC PLANTS

-VOLTAGE OPTIMIZER

# WHY INSTALL SOLAR PANELS?

---

Albania has an average of 240 - 260 sunny days throughout the year and as a result the use of solar energy is quite affordable.

We save energy and therefore money on our energy bills.

More comfort and more quality of life.

Longer building life.

Contribute to environmental protection and reduction of pollutant emissions in environment.

Increase the value of the building / apartment.

---

# ENERGY EFFICIENCY

Efficient use of energy, or otherwise, "Energy Efficiency", is defined as the process of energy consumption to meet our vital needs by achieving the same results, but using less energy. Excess energy in this case is considered as saved energy.

# WHY DO WE NEED ENERGY EFFICIENCY?

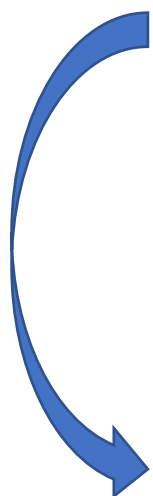

On a personal level, saving energy reduces the financial bills that consumers and public institutions have to pay.

On a broader scale, reducing energy consumption is one way to reduce greenhouse gas emissions into the atmosphere while protecting the environment.

Energy saving is one of the basic conditions for the economic development of a country and also remains one of the mandatory policies for countries aspiring to be part of the European Union.

*Përdorim joeficient i energjisë*

## Përfitimet ekonomike

2-3 persona  
implant fotovoltai

**3,4kWp**

Furnizimi me energji:

- Pajisjeve elektroshtpiake
- Kondicion e rë
- Kompjuter
- Pompë uji etj

**63 745 lekë**

4 persona  
implant fotovoltai

**5kWp**

Furnizimi me energji:

- Pajisjeve elektroshtpiake
- Kondicion e rë
- Kompjuter
- Pompë uji etj

**95 593 lekë**

5+ persona  
implant fotovoltai

**6,3kWp**

Furnizimi me energji:

- Pajisjeve elektroshtpiake
- Kondicion e rë
- Kompjuter
- Pompë uji etj

**13 5490 lekë**

# VOLTAGE OPTIMIZERS

Voltage optimizers are devices that, by means of a reduction and stabilization of the supply voltage, allow to limit the absorbed power, bringing electricity savings and a consequent cost limitation.

In fact, for a variety of reasons, the voltage of the current is often higher than its nominal value, reaching peaks higher than 10%.

Therefore, the use of these devices, in addition to saving energy, reduces the consumption of electrical equipment.

## WHY SHOULD I PUT A VOLTAGE OPTIMIZER IN MY BUSINESS?

- Protect equipment from possible problems in the power supply network (it overvoltages, overcurrents, unwanted harmonics.).
- Provide constant voltage at the most optimal values for the operation of equipment by eliminating their strain and consequently increases their lifespan .
- Energy saving from 9-20%. Depending on the type of load.
- Monitoring of consumption in real time even with the presentation of graphs  consumption with time packages.

# REGIONAL PROGRAM FOR FINANCING GREEN ECONOMY (GEFF)

The European Bank for Reconstruction and Development (EBRD) Green Economy Financing Credit Program (GEFF) provides financing for the housing sector as well as for businesses offering energy efficiency products, renewable energy products and services to individuals.

INFINITY POWER IS PART OF THE GEFF PROGRAM.

# BENEFITS FROM GEFF

## For individuals

- Reduction of energy consumption through the installation of high performance technologies and efficient technologies
- Increase the family budget through lower spending.
- Better equipment performance
- More comfortable home
- Increase in the value of real estate

## For businesses

- Greater turnover
- Larger sales / production of efficient technologies and renewable energies
- Better access to green technologies and solutions for the housing sector
- For Environment
- Preservation of precious natural resources
- Pollution reduction
- Healthier environment

## TREE PLANTING CERTIFICATE

### Infinity Power

We consider you a valued member of the Western Balkans Green Economy Financing Facility (WB GEFF) and we have donated 20 trees in your name to be planted in the Western Balkans.

Thank you for your contribution to creating a better world for current and future generations and for the planet Earth.
